Duckering Building Loading Procedures

May 28th – August 31st, 2013

Due to Tanana Loop closing for the summer for construction of the new building, Facilities Services is modifying the loading and unloading procedures for the Duckering Building.

Below please find the temporary regulations for loading zones. If you have any questions or concerns at any time this summer regarding the procedures, or you would like additional assistance with loading for safety reasons, please Paul Brown at x5216 or pkbrown@alaska.edu, or Joel Bailey at x6151 or jbailey@alaska.edu. If you are not able to reach either of the above contacts, please reach Aly Englert at x5457 or aenglert@alaska.edu.

Note: If possible, please utilize the 20 minute delivery zone located in the most northern parking spot in the Signer’s Hall lot.

Please use extreme caution when driving on the quad and give all pedestrians and construction equipment the right of way.

Loading Zones:
- See attached map—loading areas indicated with red triangle
  - Northwest entrance of Duckering
  - Southeast corner of Rasmuson Library

Loading Zones POV (Privately Owned Vehicle) Access:
- Drive on to quad from the Signer’s Hall parking lot; preferred access point is on north side of quad
  - From there, drive from the library in front of Brooks to the northwest doors of Duckering
- Be careful as to not obstruct pedestrian paths or emergency vehicles.
- There will be signage to designate vehicle loading and unloading zones. Please watch for pedestrians.

Loading Process:
- POVVs (Privately Owned Vehicles) may be parked on the sidewalk by the northwest corner of Duckering
- If it is necessary to back up to building, please have another individual behind the vehicle to guide, watch for pedestrians, and warn pedestrians of moving vehicle.
- Only one group of researchers should access the loading zone at a time, with a maximum of two POVs in the zone at one time.
- Loading zone is subject to a strict 30 minute limit. If you will require longer than that to load your equipment, please contact Facilities Services ahead of time to arrange for special circumstances.
- The key to the mullion (the bar that separates the entrance doors) can be obtained in Duckering Room 248. Contact Paul Brown at x5216 or any of the other personnel in the office. Please try to schedule ahead of time.
Summer 2013
Construction
Core Campus

Recommended Parking
No Parking
Limited ADA and Restricted
Construction Site
Recommended Pedestrian Route
Shuttle Stop
On-call Shuttle Stop
MACS Stop

Changes will occur in stages beginning April 1. Updates will be added to the website as they become available.
